ABOUT ME

IT Project Manager with 10+ years of hands-on experience in eCommerce and integrations, and more recently fintech. I turn business and legal requirements into clear specifications, coordinate business, technical and vendor teams, and see the work through testing and go-live. Experience spans five SEE markets, from an SAP Commerce platform migration to EU cross-border VAT and fintech readiness under financial regulation.

CORE SKILLS

- **Multi-Market Delivery:** Five-market webshop migration, a Slovenian webshop under EU One Stop Shop VAT rules and readiness for a regional fintech expansion under central bank and financial regulation.
- **Requirements & Integrations:** Functional specifications, business rules, data mapping and REST API specifications for integrations with ERP, WMS, insurance, banking, loyalty and logistics partners.
- **Stakeholder & Vendor Management:** Clear communication between business and technical teams, external vendors and partners, through workshops, sprint reviews and steering meetings.
- **Agile Delivery & Reporting:** Scrum and Kanban: sprint planning, backlog, UAT and release readiness, with Jira dashboards and JQL filters for status meetings and client reporting.
- **AI-Assisted Project Management:** Scheduled AI agents for daily work summaries and follow-up reminders; AI for meeting minutes, Jira tickets and Confluence pages. All output reviewed before use.

PROFESSIONAL EXPERIENCE

Project Manager | **SHAPE** (MYTY Group)

Mar 2026 – Sep 2026 | Zagreb, Croatia

- Directed technical and operational readiness for a regional fintech client's app expansion into SEE markets, coordinating compliance requirements under central bank and financial regulatory frameworks.
- Ran regular alignment between steering committees, partner banking PMs and legal teams across jurisdictions.
- Coordinated external vendors, localized third-party integrations and security audit workflows.
- Ran scheduled Claude agents for daily work summaries and follow-up reminders, reviewing all AI output.
- **Outcome:** Took the project through testing and regulatory approval to final preparations for a phased production go-live.

IT Delivery Manager / Business Analyst | **K2-18b** (M SAN Group)

Mar 2025 – Mar 2026 | Zagreb, Croatia

- Designed the logic, workflows and data mapping for the integration between the eKupi webshop and UNIQA insurance systems, and coordinated implementation, testing, deployment and monitoring.
- Coordinated a localized webshop for Slovenia across business, legal and technical workstreams under EU One Stop Shop VAT: user stories, sprints, UAT and go-live readiness.
- Specified and coordinated eKupi features: a dropshipment model with a supplier portal, checkout A/B testing, supplier price protection, delivery zone rules and legally required anchor prices.
- Coordinated an internal team (system architect, 5 backend developers, business analyst), partner developers and finance, ERP and warehouse teams; built Jira dashboards with my own JQL filters for status meetings and weekly client reporting.
- **Outcome:** Customers now receive insurance confirmations automatically after purchase, anchor prices went live by the legal deadline, and wrong supplier prices are blocked before customers can buy at them.

IT Delivery Manager | A007 plus d.o.o. (Fortenova Group) → Kenty Adria

Jun 2022 – Jan 2025 | Zagreb, Croatia

After A007 closed in Sep 2024, the team transferred to Kenty Adria to continue B2B and B2C e-commerce delivery.

- Coordinated A007's part of the Fortenova Group euro changeover: specified the dual kuna/euro price display across all customer touchpoints and coordinated webshop, ERP and operations to a fixed national deadline.
- Led the Tokić loyalty integration and proposed the solution (XML product feed, points redemption at checkout, order reporting), coordinating two development teams; upgraded the webshop for MultiPlus loyalty points.
- Integrated dropshipping with TISAK, writing the XML feed specification and the order process between the two companies, and coordinated the logistics partners GLS, Milšped, Labaš and CRO Express.
- Delivered the Abrakadabra mobile app with an external vendor: wrote the REST API specification, prioritized the backlog, handled change requests, worked with the payment gateway vendor and tested the app.
- Kenty Adria: wrote the functional specification for a multi-brand webshop (11 epics), reviewed legal requirements in six countries, evaluated nine agencies and built a CAPEX/OPEX cost model.
- **Outcome:** Dual price display went live on 5 Sep 2022 and the business moved to the euro on 1 Jan 2023; the TISAK, Tokić and MultiPlus integrations went live.

Project Coordinator / Business Analyst | eKupi (M SAN Group)

Apr 2016 – Jun 2022 | Zagreb, Croatia

- Member of the team that migrated eKupi's webshops to SAP eCommerce across Croatia, Serbia, Bosnia and Herzegovina, Montenegro and North Macedonia: validated product and content data, configured payment and delivery options and tested order processes.
- Wrote dozens of user guides and trained close to 200 colleagues across 5 countries in role-based workshops.
- Tested SAP Commerce promotion types and order and invoice flows, including payments, returns, split, cancelled and multi-supplier orders.
- Supported the outdoor parcel lockers and Web Kredit instalment loans with Raiffeisen bank through testing, configuration, documentation and contact with the bank's IT department.
- **Outcome:** Five webshops moved to one platform without data loss; parcel lockers and Web Kredit went live.

TOOLS & TECHNOLOGIES

- **PM Tools & Frameworks:** Jira (dashboards, JQL), Confluence, Trello, MS Office, Google Workspace, Scrum, Kanban, Waterfall
- **API, Integration & Data:** REST APIs, Postman, Swagger, Kibana, Dynatrace, FlexibleSearch (HAC), SQL
- **Web & Version Control:** GitHub (commits, pull requests, issues, Actions), GitHub Pages, Pages CMS
- **ERP & Commerce:** SAP Commerce (Hybris), SAP Business One, Business Central, Dynamics 365, Pimcore
- **AI Tools:** Claude, Claude Code, Gemini, Fellow.ai, Prompt Engineering, scheduled AI agents
- **Diagrams:** BPMN, MS Visio, draw.io, Lucidchart
